Subject Index to Volumes 74–80, 1996

Aging Parameters, Defining and Measuring, 78:217
Assignment Policy, Optimal, of a Single Server Attended by Two Queues, 80:245
Asymptotically Monotone Solutions of Second-Order Quasilinear Differential Equations, Oscillation and, 79:207
Attainability Sets, Finite-Dimensional Parametrizations of, 78:137
Autoregressive Processing Units for Time Series Modeling, A Network of, 75:151

Banach Space, Perturbed Newton-Like Methods in, 74:119, 143
Bargaining Method, The Alternating Offer, Under Uncertainty, 76:133
Bayes Estimators, Adaptive, for Parameters of the Gompertz Survival Model, 75:167
Bernstein Representation, Stochastic, Multiplication-Free Evaluation of Polynomials via a, 79:1
Bifurcations in Persistence Theory, 79:125
Bioactive Carbon Adsorbers, Modeling: A Hybrid Weighted Residual-Finite Difference Numerical Technique, 76:99
Block-Triangular Forms, An Algorithm for Finding, 76:161
Boolean and Non-Boolean Algebra, Bootstrapping System Defined by Inconsistent Relation between, 79:43
Bootstrapping System Defined by Inconsistent Relation between Boolean and Non-Boolean Algebra, 79:43
Boundary Criteria; Stability of Discrete-Delay Systems, 80:95
Boundary Element Method, Recent Developments in the Numerical Evaluation of Particular Solutions in, 75:91
Boundary Value Problem of a Third-Order Mixed Type Differential-Difference Equation, 80:273
Boundary Value Problem, First-Order Periodic, Generalized Quasilinearization and, 77:113
Boundary Value Problem, Second Order, with Optimal Rates of Convergence, Least-Squares Finite Element for, 76:267
Boundary Value Problems, Two-Point, with Periodic Conditions, On the Convergence of Finite Difference Methods for a Class of, 75:287
Bounded Distributed Forces, Control of Elastic Systems by, 78:103
Brouwer Fixed-Point Problems, a Class of Nonconvex, Homotropy Method for, 74:65
Burridge–Knopoff Model, 77:131

Cancer Research, Computer Simulation Applied to Radiation Therapy in, 74:191
Cauchy Principal Value Integrals, The Use of Spline-on-Spline for the Approximation of, 80:23
Cavity Problem, 3-D Buoyancy Driven, Numerical Solution of, by the Pseudospectral Method, 75:43
Cayley and Orr Types of Hypergeometric Identities: Alternative Approaches, 76:1
Cell Exclusion Algorithm for Determining All the Solutions of a Nonlinear System of Equations, 80:181
Chandrasekhar H-Equation, Decomposition Method Applied to, 77:67
Chaotic Dynamical Systems Using Linear Associative Memories, Obtaining Initial Parameter Estimates for, 76:143
Chaotic Waveform Relaxation Methods for Dynamical Systems, 78:83
Collocation Methods for Volterra Integral Equations, Stability Results for, 79:267
Complementarity Problems, Open Set Nonlinear, Existence Condition for, with Application to a Closed Economic System, 76:285
Computer Architectures, Optimized Extrapolation Methods for Parallel Solution of IVPs on Different, 77:301
Computer Simulation Applied to Radiation Therapy in Cancer Research, 74:191
Context-Free Relations and Their Characteristics, 79:163
Control Algorithms, Nonlinear, and Power System Application, 78:197
Convex Programming Problems, A Projected Cutting Plane Algorithm for, 74:261
Coordinate Transformation and Differencing Schemes, Effects on Matrix Structure and Convergence History, 77:53
Correlated Normal Errors, Regression-Based

APPLIED MATHEMATICS AND COMPUTATION 80:301–306 (1996)

PII S0096–3003(96)00277-9

Prediction for Two-Stage Survey Data with, 79:105
Cylinder, Inhomogeneous Transversely Isotropic Thermoelastic, Transient Response to Dynamic Input, 74:1

Decomposition Method Applied to Chandrasekhar *H*-Equation, 77:67
Delay Differential Equations with Impulses, The Nonoscillatory Solutions of, 77:153
Delay Differential Equations of Population Dynamics, Oscillations and Global Attractivity in, 77:195
Delay-Differential Systems, Neutral, Some Simple Criteria for Stability of, 80:257
Determinants, Quick Evaluation of, 75:117
Difference Systems, A Correction on the Stability of Implicit Higher Order, 74:299
Differential-Difference Equation, Third-Order Mixed Type, Boundary Value Problem of, 80:273
Differential and Difference Inequalities Generated by Mixed Problems for Hyperbolic Functional Differential Equations with Impulses, 80:127
Differential Equations with Impulses, Hyperbolic Functional, Differential and Difference Inequalities Generated by Mixed Problems for, 80:127
Differential Transformation, Application to Eigenvalue Problems, 79:173
Differintegral Equations, An Application of Fractional Calculus to the Solution of a General Class of, 77:137
Discrete-Delay Systems, Stability of: Boundary Criteria, 80:95
Distributed Computing Systems, Stability of Dynamic Groups in, 74:223
Domain Decomposition Method for Nonlinear Generalized Schrödinger-Type Systems: Semi-Discrete Problem, 77:33
Domain Decomposition, Sinc Methods for, 75:13
Dusty Gas Flow Through Porous Media, 75:59
Dynamic Input, Transient Response of Inhomogeneous Transversely Isotropic Thermoelastic Cylinder to, 74:1
Dynamic Optimization Problems, Numerical Solution of, Using Parametrization and OptiA Software, 78:111
Dynamic Systems, Time Continuous Model of, A New Forecasting Method for, 80:225
Dynamical Systems, Chaotic Waveform Relaxation Methods for, 78:83
Dynamics and Control, Introduction to the Special Issue on, 78:101

Economic System, Closed, An Existence Condition for Open Set Nonlinear Complementarity Problems with an Application to a, 76:285
Effectivity Estimation of HIV Infection Therapies, Use of a Mathematical Model for, 78:153
Eigenvalue Problems, Application of Differential Transformation to, 79:173
Elastic Systems, Control of, by Bounded Distributed Forces, 78:103
Electromagnetic Scattering, Coupled Maxwell Equations for, 77:133
Elliptic Differential Inclusions, Smoothing and Monotone Iterations for, 74:15
Epidemic Model with Screening, Existence of Steady State Solutions to, and Their Asymptotic Stability, 74:37
Epstein–Hubbell Elliptictype Integral and Its Generalizations, 77:9
Equations Satisfied by a Nine Parameter Subsystem Obtained from Mathematical Aesthetic Principles, 80:63
Equicorrelation Coefficient in Standard Symmetric Multivariate Normal Distribution, Some Optimal Tests for, 75:269
Exoatmospheric Target Vehicle Tracking, Filter Sensitivity in, 79:249
Exponential Functions, Gaussian Quadrature for Products of, 79:189
Extrapolation Methods, Optimized, for Parallel Solution of IVPs on Different Computer Architectures, 77:301

Fast Hartley Transforms, Multiprecision Arithmetic Using, 75:239
Filter Sensitivity in Exoatmospheric Target Vehicle Tracking, 79:249
Finite Difference Methods for a Class of Two-Point Boundary Value Problems with Periodic Conditions, On the Convergence of, 75:287
Finite Difference Methods for a Class of Two-Point Boundary Value Problems with Periodic Boundary Conditions, On the Convergence of, 75:287

Finite Differences System, A Method for Increasing the Preciseness of a, 75:253
Finite Elements, Optimum Beam Design Using, 80:155
Finite-Dimensional Parametrizations of Attainability Sets, 78:137
Fluid Conveying Tubes, $O(2)$-Symmetric, Heteroclinic Cycles in the Three-Dimensional Postbifurcation Motion of, 78:269
Fluid Flow Theory, The Solution of a Partial Differential Equation Arising in, 77:295
Focal Points and Second-Order Linear Differential Equations, 79:203
Forecasting Method, A New, for Time Continuous Model of Dynamic Systems, 80:225
Fractional Calculus, An Application of, to the Solution of a General Class of Differintegral Equations, 77:137
Free Kramer Equation, On the Similarity Solutions of, I, 74:59
Frequency Modulated Sinusoid, Half-Wave Linear Rectification of a, 79:137

Gaussian Quadrature for Products of Exponential Functions, 79:189
Gauss–Seidel, Acceleration of Five-Point Red–Black, in Multigrid for Poisson Equation, 80:73
Global Economic Growth with Nonlinear Hereditary Dynamics, Universal Laws for the Control of, 78:19
Global Optimization, Interval Methods for, 75:179
Gompertz Survival Model, Adaptive Bayes Estimators for Parameters of, 75:167

Half-Wave Linear Rectification of a Frequency Modulated Sinusoid, 79:137
Hankel Matrices, Application of, in Polynomial Regression, 77:205
Hemopoietic Model, Interval Analysis as a Tool for Sensitivity Analysis of a, 78:259
Hereditary Dynamics, Nonlinear, Universal Laws for the Control of Global Economic Growth with, 78:19
HIV Infection Therapies, Use of a Mathematical Model for Effectivity Estimation of, 78:153
Homotopy Interior Point Method, A Combined, for General Nonlinear Programming Problems, 80:209
Homotopy Method, Finding Periodic Solutions of Ordinary Differential Equations via, 78:1
Homotopy Method for a Class of Nonconvex Brouwer Fixed-Point Problems, 74:65
Hyperbolic Functional Differential Equations with Impulses, Differential and Difference Inequalities Generated by Mixed Problems for, 80:127
Hyperbolic System, An Iterative Procedure for Estimation of Variable Coefficients in a, 76:213
Hypergeometric Identities of Cayley and Orr Types: Some Alternative Approaches, 76:1

Indirect Approximation Problem, A Method for Solving, 77:97
Inequality Constraints in the Process of Jumping, 78:163
Integral Equations, Two Methods for Solving, 77:79
Integral Equations, Weakly Singular Second-Kind Volterra-Type, A Reliable Technique for Solving, 80:287
Interval Methods for Global Optimization, 75:179
Iterations, Smoothing and Monotone, Elliptic Differential Inclusions, for, 74:15
Iterative Methods for Computing the Generalized Inverses $A^{(2)}_{T,S}$ of a Matrix A, 75:207
IVPs, Optimized Extrapolation Methods for Parallel Solution of, on Different Computer Architectures, 77:301

Jones Polynomials, An Algorithm for Calculating, 74:249
Jumping, Inequality Constraints in the Process of, 78:163
Junction Field Effect Transistors, Perturbation Approach for Low Frequency Noise in, 74:161

Kadomtsev-Petviashvili Equation, 76:95
Kakutani Fixed Points, Notes on Computation of, 75:139

Layered Media Under Initial Stresses, Wave Propagation in, 74:95
Learning Control, On Some Algorithms of, 78:209
Least-Squares Finite Element for Second Order Boundary Value Problem with Optimal Rates of Convergence, 76:267

Linear Associative Memories, Obtaining Initial Parameter Estimates for Chaotic Dynamical Systems Using, 76:143
Linear Programming, Multirational Function Approximation via, 75:75
Logistic Function, Generalized, The Existence of Optimal Parameters of, 77:281
Lotka-Volterra Systems with Time Delay, Robust Interval Stability, Persistence, and Partial Stability of, 75:103
Lotka-Volterra Three-Species System, General, Non-Perturbative Analytical Solution of, 76:251

Many-Variable Polynomial Interpolation, Massively Parallel Computation of, 80:105
Mars Entry, Optical Navigation Error during, 80:1
Massively Parallel Computation of Many-Variable Polynomial Interpolation, 80:105
Mathematical Aesthetic Principles, Equations Satisfied by a Nine Parameter Subsystem Obtained from, 80:63
Matrices, Positive Definite, Real-Time Computation of the Eigenvectors of a Class of, 77:267
Matrix A, Iterative Methods for Computing the Generalized Inverses $A^{(2)}_{T,S}$ of, 75:207
Matrix Structure and Convergence History, Effects of Coordinate Transformation and Differencing Schemes on, 77:53
Maxwell Equations, Coupled, for Electromagnetic Scattering, 77:133
Mean Value Theorem, On the Differentiability of Set-Valued Functions Defined on a Banach Space and, 74:79
Mismatched Systems, Robust Constrained Control for Vibration Suppression of, 78:245
Modified Limiting Dilution Assay for Cell Systems, 78:187
Multicriterion Analysis of the Water Allocation Conflict in the Upper Rio Grande Basin, 77:245
Multigrid Method, A p-Cycle Analysis of, 76:41
Multiple Jet Plume Interactions, Unsteady, Numerical Analysis of, 79:239
Multiplication-Free Evaluation of Polynomials via a Stochastic Bernstein Representation, 79:1
Multiprecision Arithmetic Using Fast Hartley Transforms, 75:239
Multirational Function Approximation via Linear Programming, 75:75
Multivariate Normal Distribution, Standard Symmetric, Some Optimal Tests for the Equicorrelation Coefficient in, 75:269

Navier-Stokes Equations with Small Stochastic Perturbations, Large Deviation for, 76:65
Newton Methods, Results on; Part I. Unified Approach for Constructing Perturbed Newton-Like Methods in Banach Space and Their Applications, 74:119
Newton Methods, Results on; Part II. Perturbed Newton-Like Methods in Generalized Banach Spaces, 74:143
Nonlinear Dynamical Systems, Some New Trends in Identification and Modeling of, 78:279
Nonlinear Models, A Comparative Study for the Estimation of Parameters in, 77:179
Nonlinear Programming Problems, General, A Combined Homotropy Interior Point Method for, 80:209
Nonlinear Random Vibration, 77:109
Nonlinear System of Equations, A Cell Exclusion Algorithm for Determining All the Solutions of , 80:181
Nonoscillatory Solutions of Delay Differential Equations with Impulses, 77:153

ODEs, Varying the Componentwise Order of the Multistep Methods in Solving, and Its Absolute Stability, 74:209
One-Parameter Exponential Families, Detection of Random Change Point in, 77:167
Open Set Nonlinear Complementarity Problems, An Existence Condition for, with Application to a Closed Economic System, 76:285
Operator-Differential Equations, Quickly Oscillating Solutions of, 75:1
OptiA Software, Numerical Solution of Dynamic Optimization Problems, Using Parametrization and, 78:111
Optical Navigation Error during Mars Entry, 80:1
Optimal Control Problems with Parameters, Constrained, Numerical Solution of, 80:43
Optimum Beam Design Using Finite Elements, 80:155

Ordinary Differential Equations, Finding Periodic Solutions of, via Homotopy Method, 78:1
Ordinary Differential Equations with Boundary Conditions, Second-Order, Higher-Order Methods for Eigenvalues of, 76:293
Ordinary Differential Equations of the Second Order, A Method for Solving the Parameter Identification Problem for, 74:273
Oscillation and Asymptotically Monotone Solutions of Second-Order Quasilinear Differential Equations, 79:207
Oscillations and Global Attractivity in Delay Differential Equations of Population Dynamics, 77:195

Parallel Processing with Variable Recombination Overhead, Solutions of Two Minmax Recurrences in, 76:173
Parameter Estimates for Chaotic Dynamical Systems Using Linear Associative Memories, Obtaining Initial, 76:143
Parameter Identification Problem for Ordinary Differential Equations of the Second Order, A Method for Solving, 74:273
Parametrization and OPTIA Software, Numerical Solution of Dynamic Optimization Problems Using, 78:111
Partitioning Ordinary Differential Equations Using Runge-Kutta Methods, 79:289
Pascal-Like Triangle, Consistency Relations of the Spline Functions Derived from, 74:293
p-Cycle Analysis of the Multigrid Method, 76:41
Periodic System, Stability Study of, by a Period-to-Period Mapping, 78:123
Period-to-Period Mapping, Stability Study of a Periodic System by, 78:123
Persistence Theory, Bifurcations in, 79:125
Persistence, Robust Interval Stability, and Partial Stability of Lotka-Volterra Systems with Time Delay, 75:103
Perturbation Approach for Low Frequency Noise in Junction Field Effect Transistors, 74:161
Planar Systems, A Universal Servomechanism for a Class of Nonlinear, 78:229
Poisson Equation, Acceleration of Five-Point Red–Black Gauss–Seidel in Multigrid for, 80:73
Polar Fluid Lubrication, Thin-Film, Aspects of, 80:33
Pollution Model, Parallel Simulation of a Cellular, 79:27
Polynomial Regression, Application of Hankel Matrices in, 77:205
Population Dynamics, Oscillations and Global Attractivity in Delay Differential Equations of, 77:195
Population Dynamics Growth, Stage-Structured, with Time State-Dependent Time Delay, Analysis of a Model of, 77:185
Porous Media, Dusty Gas Flow Through, 75:59
Porous Media, Heterogeneous, Time-Periodic Transport in, 75:119
Postbifurcation Motion of $O(2)$-Symmetric Fluid Conveying Tubes, Three-Dimensional, Heteroclinic Cycles in, 78:269
Power System Application, Nonlinear Control Algorithms and, 78:197
Preciseness of a Finite Differences System, A Method for Increasing, 75:253
Probability Distributions, On Interpolating Between, 77:213
Pseudospectral Method, Numerical Solution of the 3-D Buoyancy Driven Cavity Problem by the, 75:43

Quadrature Schemes for a General Family of Functions, 77:1
Quasilinearization, Generalized, and First-Order Periodic Boundary Value Problem, 77:113
Queues, Optimal Assignment Policy of a Single Server Attended by Two, 80:245

Random Change Point in One-Parameter Exponential Families, Detection of, 77:167
Real-Time Computation of the Eigenvectors of a Class of Positive Definite Matrices, 77:267
Recombination Overhead, Variable, Solutions of Two Minmax Recurrences in Parallel Processing with, 76:173
Regression-Based Prediction for Two-Stage Survey Data with Correlated Normal Errors, 79:105
Remotely Operated Underwater Vehicle, Controlling the Position of a, 78:175
Residual-Finite Difference Numerical Technique, A Hybrid Weighted; Modeling Bioactive Carbon Adsorbers, 76:99

Residual-Finite Difference Numerical Technique, Hybrid Weighted, Modeling Bioactive Carbon Adsorbers, 76:99
Runge-Kutta Methods, Partitioning Ordinary Differential Equations Using, 79:289

Schrödinger-Type Systems, Nonlinear Generalized, Domain Decomposition Method for: Semi-Discrete Problem, 77:33
Second-Order Linear Differential Equations, Focal Points and, 79:203
Second-Order Quasilinear Differential Equations, The Oscillation and Asymptotically Monotone Solutions of, 79:207
Sensitivity Analysis of a Hemopoietic Model, Interval Analysis as a Tool for, 78:259
Set-Valued Functions Defined on a Banach Space, On the Differentiability of, and Mean Value Theorem, 74:79
Sigmoid Approximation of the Standard Normal Integral, 77:91
Similarity Solutions of the Free Kramer Equation. I, 74:59
Sinc Methods for Domain Decomposition, 75:13
Spline Functions Derived from Pascal-Like Triangle, Consistency Relations of the, 74:293
Spline-on-Spline, Use of, for the Approximation of Cauchy Principal Value Integrals, 80:23
Stability of Discrete-Delay Systems: Boundary Criteria, 80:95
Stability of Dynamic Groups in Distributed Computing Systems, 74:223
Stability of Implicit Higher Order Difference Systems, A Correction on the, 74:299
Stability of Neutral Delay-Differential Systems, Some Simple Criteria for, 80:257
Stability Results for Collocation Methods for Volterra Integral Equations, 79:267
Stability Study of a Periodic System by a Period-to-Period Mapping, 78:123
Stability, Robust Interval, Persistence, and Partial Stability of Lotka-Volterra Systems with Time Delay, 75:103
Standard Normal Integral, Sigmoid Approximation of, 77:91
Stochastic Bernstein Representation, Multiplication-Free Evaluation of Polynomials via a, 79:1
Systems of Equations, Evaluating: Toward a Formal Approach, 75:223

Time Continuous Model of Dynamic Systems, A New Forecasting Method for, 80:225
Time Series Modeling, A Network of Autoregressive Processing Units for, 75:151
Time-Periodic Transport in Heterogeneous Porous Media, 75:119
Two-Stage Survey Data with Correlated Normal Errors, Regression-Based Prediction for, 79:105

Uncertainty, The Alternating Offer Bargaining Method Under, 76:133
Underwater Vehicle, Controlling the Position of a Remotely Operated, 78:175

Vibration Suppression of Mismatched Systems, Robust Constrained Control for, 78:245
Vibration, Nonlinear Random, 77:109
Volterra Integral Equations, Stability Results for Collocation Methods for, 79:267
Volterra-Type Integral Equations, Weakly Singular Second-Kind, A Reliable Technique for Solving, 80:287

Water Allocation Conflict in the Upper Rio Grande Basin, A Multicriterion Analysis of, 77:245
Wave Propagation in Layered Media Under Initial Stresses, 74:95
Waveform Relaxation Method, Windowing for the, 76:49
Windowing for the Waveform Relaxation Method, A Note on, 76:49

Zero Points, On the Existence of, 79:99
